About

As a self-motivated learner, I am always driven to expand my knowledge across a wide range of programming languages and explore the diverse aspects of software development. I believe that continual learning is essential to staying ahead in the ever-evolving world of technology, and I actively seek opportunities to enhance and refine my skill set.

Skills

Html

Css

Tailwind Css

Javascript

Typescript

Next Js

Git

Docker

Experience

● Own Portfolio

Frontend Developer | Aug 2024

- Implemented SQLite to handle data storage
- Integrated next-intl for seamless multi-language support

[View Online](#)

● Menubar

Frontend - Backend | Jul 2023 - Jan 2024

- Developed a multilingual food ordering platform: Arabic, Persian, English
- Implemented OTP-based user authentication for secure sign-in
- Developed and integrated all backend APIs using Express.js and Node.js.
- Integrated Zarinpal for online payment processing
- Built a time reservation feature for customers to schedule orders
- Developed food delivery functionality with real-time updates
- Designed a dashboard for restaurant managers to manage all features

● Digitize Shopping

Frontend | Aug 2022

- Focused on leveraging the Shadow DOM to build isolated, reusable components without external libraries or frameworks
- Implemented custom UI components using vanilla JavaScript, solving challenges related to encapsulation and styling within the Shadow DOM
